

Website Sales Cheat Sheet

Quick Pitch:

"We build fast, professional websites at an affordable price - perfect for small businesses that need an online presence without paying thousands. We build your site, launch it, and even help you manage it or show you how to do it yourself."

What We Offer:

- Custom Website:

Beautiful, responsive site tailored to the business

- Fast Build Time:

First version in as little as 1 week

- No Monthly Website Builder Fees:

Not like Wix or Squarespace - the client owns their site

- Free or Low Hosting:

Netlify hosting is free for most small business sites

- Easy to Manage:

We use Bolt.new and Netlify - simple tools with powerful results

- Future-Ready:

Sites are compatible with AI tools, forms, and integrations

- Domain Help:

We can help set up or connect a domain (e.g. yourbusiness.com)

Common Objections & How to Respond:

Q: I don't need a website

A: Most people check online before calling or visiting a business. If you're not online, they may pick someone who is.

Q: I already have Facebook

A: Facebook is great, but you don't own it - and not everyone uses it. A website gives you control and looks more professional.

Q: It's too expensive

A: We charge less than traditional agencies, and hosting is often free. This is an investment in your business that pays off over time.

Q: I'm not tech-savvy

A: That's exactly why we do everything for you. And if you ever want to take over, we'll help you or your team learn how.

Q: Can I use my own hosting?

A: We host it on Netlify for speed and simplicity. But if you want, we can help you create your own Netlify account so you have control.
